Summit Information Systems Continues Workforce Expansion in Canada

Financial services veteran, Glenn Schaffrick, joins Summit team

Corvallis, Ore., 14 August 2007 – Summit Information Systems Canada, a provider of advanced Summit and Fiserv technology solutions to Canadian credit unions, has appointed Glenn Schaffrick as regional sales manager. Summit Information Systems Canada is a business unit of Fiserv, Inc. (NASDAQ: FISV).

A veteran of the financial services industry with more than 20 years experience, Schaffrick has successfully managed sales and client relationship activities at Fincentric Corporation, Bank of America Canada, and Deak Pereira Financial Brokers. In his new role with Summit, he will be responsible for managing and achieving the company's iSpectrum sales objectives in the credit union market. He will maintain an office in the new Summit operations center located in Burnaby, BC.

"iSpectrum is a fresh approach to core processing that deploys the most progressive technology and system architecture. For years the business success of Canadian credit unions has been dependent on traditional core processors that extended their applications by building on top of legacy applications and dated architecture. Built from the ground up by a market leader that knows credit unions, iSpectrum is better positioned to fulfill the operational and market-driven needs of credit unions," Schaffrick noted. "I am very excited to join the growing team of Summit professionals in Canada and look forward to the opportunity of establishing long-term, strategic partnerships with credit unions throughout the provinces."

"Glenn is well-regarded throughout the Canadian financial services industry and brings a wealth of knowledge and experience to Summit," said Kevin Sparks, president of Summit Information Systems Canada. "As iSpectrum continues to set new standards of product quality and customer service, Glenn will be a great asset and will significantly accelerate our goal of serving Canadian credit unions with modern, advanced technology solutions."

About iSpectrum

iSpectrum is a comprehensive, browser-based banking system built by Summit Information Systems exclusively for Canadian credit unions. Open at every tier, and based on the powerful Oracle® relational database, iSpectrum offers credit unions total control and flexibility to manage and customize their products and services, or easily integrate third party solutions. The blade server hardware and infrastructure design supported by iSpectrum delivers true 24/7 operation, built-in business continuity and unlimited scalability at a low total cost of ownership.

About Summit Information Systems Canada

Summit Information Systems Canada, a part of Fiserv Solutions of Canada, Inc. and based in Burnaby, BC, provides Canadian credit unions with advanced Summit and Fiserv technology solutions through in-house, service bureau or resource managed solutions. Summit products include iSpectrum for Canadian credit unions and Spectrum® for the U.S. market. Since 1980, Summit has focused on developing and delivering technology innovations and solutions that enable credit unions to cultivate member relationships and compete more effectively. For more information on Summit and iSpectrum, visit www.summitsite.com.
