Summit Financial Technologies Canada Announces Two New Clients

Business and financial needs of both a credit union and financial services group are fulfilled by the flexibility and capabilities of the iSpectrum core banking system

Brookfield, Wis. and Burnaby, B.C., November 5, 2008 – Summit Financial Technologies Canada announced today that two new clients have contracts to implement the advanced iSpectrum core banking system within their organizations. iSpectrum is the advanced core banking system developed by Summit Financial Technologies Canada, part of Fiserv Solutions of Canada, Inc., a business unit of Fiserv, Inc. (NASDAQ: FISV). Greater Vancouver Community Credit Union and the Lutheran Church Canada, Alberta/British Columbia District are the latest organizations to select iSpectrum as the core banking solution to fulfill their diverse business needs.

“Our ability to deliver a highly flexible core processing solution that fulfills the business needs of a broad range of organizations differentiates our company from others serving the financial services market,” said Kevin Sparks, president of Summit. “We are pleased to welcome these new clients into our diverse and growing Canadian clientele.”

With the addition of eight new clients this year, the company is experiencing extraordinary growth despite a downturn in the global economy. “Our expanding list of clients is testimony to the effectiveness of this company’s vision, innovative technology and strategic roadmap that empowers our clients to grow freely with new and powerful possibilities,” Sparks added.

- **Greater Vancouver Community Credit Union**, Vancouver, BC: After an extensive evaluation of the technology foundation and long-term product development at several core banking companies, GVCCU, with more than \$165 million assets, selected the iSpectrum core banking system as its long-term technology solution. The market-leading system features a true open architecture that eliminates barriers to growth, flexibility that empowers the credit union to meet the market’s competitive demands and innovative web-based technology that redefines industry standards.

- **Lutheran Church Canada**, Alberta/British Columbia District, in Edmonton, Alberta, is responsible for the management of the financial resources within the district. Through its financial ministries department, the district provides a range of support services for its congregations and their members. After an extensive review, the iSpectrum core banking system was selected for its capabilities to automate the services provided.

About Summit Financial Technologies Canada

The Summit iSpectrum banking system provides Canadian credit unions and financial organizations the most advanced technology available to help them succeed in today's competitive financial services industry. Summit Financial Technologies Canada, a business of Fiserv Solutions of Canada, Inc., delivers iSpectrum services and client support via an operations office in Burnaby, BC and a data centre in Vancouver, BC. Staffed with industry experts, the data centre supports license, service bureau/ASP and resource management delivery and service options of the iSpectrum banking system. As part of the Fiserv portfolio of innovative, best-of-breed solution providers, Summit brings to Canada a full suite of Fiserv products and services that seamlessly integrate with the iSpectrum banking system. For more information on iSpectrum, visit www.summitsite.com/ca.

About Fiserv, Inc.
